

ORGANIC ROBINIA
"EXPLORER SHIP"

KOMPAN 

The Robinia castles will give any park a regal touch: the castles are architecture for the play princesses and princes – and possibly even some kings and queens. With their scale, the Robinia Castles allow for a wide range of ages playing together and invite the whole family for a royal playday.

ROBINIA SAND & WATER PLAY

In 2017, KOMPAN will be adding a number of new structures to its Robinia portfolio that are designed specifically for children’s sand and water play. The structures feature cranes, water-mills and other tools that children can use in their exploration of the world through the magic of sand and water.

Children love playing with sand and water. These two highly tactile ingredients are great working materials for the young creative mind, and contribute to children’s early learning, experimentation and understanding of the world. When they play with sand and water, children develop their motor skills, they learn to interact in groups, and their ability to concentrate grows. In short, sand and water play is great for children’s development.

KOMPAN takes children’s development very seriously, and our new line of sand and water products are designed to enhance children’s play experiences to the max! The structures come equipped with a variety of fun tools such as cranes, strainers and water mills, all of which give children the things they need to explore and investigate even more.

SHIPS BY KOMPAN DESIGN STUDIO

The Robinia ships make a fleet of unbeatable imaginative play motivators. From the small challup to the huge schooner, these ships were crafted for play sailors with an imagination to take them anywhere.

THE ORGANIC ROBINIA VILLAGE

FROM WINDING WOODS - STRAIGHT TO PLAYGROUND FUN!

Our new ORGANIC ROBINIA designs are inspired by the organic shapes of nature itself and all the uniqueness of the winding Robinia wood. By taking a holistic approach to creating the play area, we stimulate children's interest in nature and introduce an understanding of nature into their lives.

Having enriched children's play for more than 45 years, we know that real play value matters. Based on knowledge from our KOMPAN Play Institute, we make sure children get the most out of their time on our playgrounds, by incorporating age-appropriate play and child development into our designs and solutions.

To make it complete and ensure the best quality throughout the entire process, we have built a new, world-class factory focusing entirely on production of ORGANIC ROBINIA – so we are with you all the way from planning to installation and even offer a full service and maintenance package.

THEMED PLAY FOR PRESCHOOL CHILDREN

PHYSICAL & SOCIAL PLAY FOR SCHOOL AGE CHILDREN

CRAFTSMANSHIP

ARTISTIC AND PROUD CRAFTSMANSHIP BY THE "PLAY PEOPLE"

Only the best is good enough for our customers and therefore we have built our new factory dedicated exclusively to products made of Robinia wood.

KOMPAN Robinia play equipment is the embodiment of our passion for superiority - quality and safety are fundamental parts of KOMPANs DNA. This is the only way to make sure that we always work with the best materials and have full control over production. The new facilities ensure that we meet both our own and our customers' high standards.

We only select the finest Robinia wood and use only the most durable heartwood in our production. And we make sure to live up to the highest safety standards globally.

All our products bear the fruits of intensive scientific research and knowledge of child development anchored in the internationally recognized KOMPAN Play Institute. What's more, and also unique, is that our solutions are tested and reviewed by age-relevant teams of children before they are approved for manufacturing.

KOMPAN play value is in a league of its own.

IS IT PERFECTION?

For now, perhaps. But we're always pushing our boundaries, always eager to embrace change and new knowledge. It's a journey we'd love to take with you!

AN ENVIRONMENT FOR A BETTER FUTURE

Environmentally friendly Robinia wood also has a high content of naturally occurring preservatives; that's why it doesn't need to be treated for rot in any way. At the same time, its dense composition makes it very resistant to splintering, humidity damage and water penetration.

The strength, durability and flexibility of Robinia wood also make it particularly ideal for use in natural playgrounds. The beautiful grain structure, raw de-barked tree trunks and natural, homemade appearance demonstrate the allure of nature.

When combined with the natural appearance of KOMPAN ORGANIC ROBINIA wood, the characteristic organic shapes and curves of the playhouses and structures create an exceptional visual aesthetic.

Robinia wood doesn't grow straight; its winding shapes are perfect for creating unique play equipment that blends in perfectly with nature or brings nature to an urban setting. The new KOMPAN ORGANIC ROBINIA designs are based on nature's own organic shapes and the uniqueness of Robinia wood, giving visual and tactile authenticity to the playground.

THE KOMPAN PHILOSOPHY

At KOMPAN we know that a playground is always more than just a playground. When designs really motivate play, they benefit child development. KOMPAN Playgrounds significantly improve health, learning and social inclusion - and all of it on children's terms, in a fun and independent way.

MORE PLAY, HEALTHIER CHILDREN

100% of parents agree that outdoor play promotes health. When asked, children answer that more playgrounds could encourage them to spend more time outdoors. There is substantial documentation of the physical health benefits of play for children and teenagers – particularly girls – and even for adults and senior citizens. KOMPAN products are designed with health in mind, integrating the motivators that make kids and adults want to move and meet in play into our designs. It's voluntary, it's fun, it's healthy - and it's beneficial to the individual and society alike.

MORE PLAY, MORE EFFICIENT LEARNING

Life skills, be they motor skills, sensory skills, social skills, emotional skills or creative skills, are all trained voluntarily and in a fun way in good playgrounds - and so are cognitive skills. A body of research states that even when replacing some academic activity with outdoor activity and play, children end up with better average grades and better classroom behavior. It is a known fact that physical activity and play help children concentrate better in class. At KOMPAN we design products to make play and learning go hand in hand. It's work for the future and it works for children now.

MORE PLAY, MORE SOCIAL INCLUSION

Many cities successfully use playgrounds to provide a unique, playful framework for social inclusion and interaction. Inclusive playgrounds have proven to be diversions for crime and vandalism. They unite people in play and they include all abilities on a common social ground. Universal design and inclusive play are cornerstones of KOMPAN's philosophy and play design. Most of our playground equipment offers play activities for all, through clear design signals and multifunctional play. In KOMPAN's view, designing for users with varying abilities means designing for all.

THE KOMPAN PLAY INSTITUTE

Much of the knowledge our products are built on comes from the KOMPAN Play Institute – our own in-house knowledge center. The KOMPAN Play Institute is an international network of play and child specialists who monitor how different trends in society influence children's development and play patterns.

The institute also initiates and takes part in different research projects around the world, aiming to benefit children, teenagers and the adults who work with them by sharing knowledge. Our products are designed to address the demands of one or more of the key areas of child development and they can also cover specific curriculum requirements.

We can blend a suitable selection of products for an exciting, fun play solution that matches your children's particular needs perfectly. You can follow the institute's work at seminars and conferences, through scholarly articles, and by visiting the institute's website at www.KOMPAN.com.

The KOMPAN Play Institute compiles research from a broad range of academic fields, including play and health, play and age groups, play rights, inclusion and accessibility.

Always eager to share knowledge, the KOMPAN Play Institute runs campaigns designed to increase general awareness, as well as documenting children's need for active outdoor leisure and play facilities.

THE KOMPAN KEY TO A NATURAL PLAY EXPERIENCE

IN OUR OPINION

Every group of playground users is unique. So is every potential playground site. Our primary goal is to ensure that each playground is tailored uniquely to the customer's requirements. Our multidisciplinary team of play consultants, landscape designers and other experts follow a specially developed KOMPAN planning process. Working closely with the customer, we look at five different areas. The result is a completely original, custom-designed playground solution that provides the greatest possible value for the specific playground users, the site – and the customer.

THE AREAS WE LOOK AT ARE:

- The children who will use the playground
- The skills and experience the customer wants the playground to promote
- The playground site and immediate surroundings
- How the playground should be divided into spaces in order to support different types of play
- What play equipment or other activities should be integrated into each space to expand the children's experiences and stimulate their competences. Every choice is made taking into consideration how the site can best deliver the benefits that the customer wants for the site's users.

KOMPAN!

LET'S PLAY IT GREEN

Available with FSC™ certification

KOMPAN is fully certified in accordance with FSC™ guidelines, which means we can document the entire provenance of our materials and prove our commitment to sustainable forestry. The KOMPAN ORGANIC ROBINIA range can be ordered in FSC™ certified wood. The FSC aims to preserve forests through the promotion of responsible forestry. We are happy to provide an FSC™ certificate upon request.

KOMPAN ORGANIC ROBINIA solutions are available both as untreated wood, brown pigmented (transparent stain) or with painted parts. We use an environmental friendly, water-based acrylic paint that meets European Standard EN71-3 specifying safety requirements for toys.

UNTREATED ROBINIA WOOD

This option is in tune with nature. The de-barked tree trunks of unpreserved Robinia wood will get a fine grayish patina over time and blend in with the surroundings.

TRANSPARENT BROWN PIGMENTED ROBINIA

This option maintains the original glow of Robinia wood. To maintain the golden glow of the play equipment, all wooden components are painted with a transparent brown pigmented stain which highlights the wood's grain.

COLOR PAINTED ROBINIA WOOD

This is a colorful option for a unique play solution. This color combination, designed by KOMPAN, emphasizes certain components like steps & window frames. The color composition also strengthens the ORGANIC ROBINIA FAMILY concept with a uniform appearance.

CARING FOR YOUR ROBINIA PRODUCTS

Even the best Robinia wood in the world needs proper care...

ROBINIA WOOD

Robinia wood is ideal for designing natural-looking playgrounds. It's almost as if nature created Robinia wood just for this purpose! Robinia is categorized as a hardwood that can survive in an outdoor environment for many years without any chemical treatment. It has excellent mechanical strength and a natural resistance to fungi and insects.

PRODUCT DESIGN

Every Robinia trunk has a unique form. So for each product, KOMPAN carefully selects individual trunks and combines them with organically shaped panels, roofs and activities to create playgrounds that blend in beautifully with nature. Our play structures are assembled with specially designed steel hardware for optimum durability and to ensure the safest play.

CRACKS & REPAIR

Wood is a living material. Changing weather conditions (wet/dry - hot/cold) mean that cracks will inevitably appear over time. Although some cracks will close by themselves, major cracks will need to be repaired in accordance with a fixed set of instructions. KOMPAN can supply a special kit for this purpose.

INSPECTION & MAINTENANCE

Playgrounds must be inspected and maintained regularly in accordance with the KOMPAN maintenance manual. KOMPAN offers a service agreement to ensure your Robinia playground continues to be a safe play environment.

SPARE PARTS & WARRANTY

All items can be replaced with original KOMPAN parts. Replacement Robinia wood components are supplied semi-fabricated. In some cases the wood needs to be customized on site to fit the specific item to be replaced.

...KOMPAN offers a full service agreement for your Robinia playground

QUALITY GUARANTEED

A playground is only as good as its materials. The KOMPAN warranty is our promise to you that we will stand behind the equipment we sell and be there to support you. For the Robinia series, we offer a warranty of:

2 YEARS against malfunctions due to material or production defects on movable plastic and metal parts.

5 YEARS against failure due to material or production defects on resin coated plywood plates, other painted metal parts, springs and ball bearing assemblies, other rope and net constructions, concrete elements.

10 YEARS against failure due to material or production defects on all HPL floors and panels, galvanized and aluminum metal parts with painted top layer, other galvanized metal parts, other stainless steel parts, Corocord rope, "S" clamps of stainless steel, solid plastic parts, hollow plastic parts, non-painted metal parts, engineered timber and Robinia wood.

A PLAYGROUND IS ONLY AS GOOD AS IT IS RELIABLE

1. WARRANTY COVERAGE

This warranty applies to KOMPAN's products for the time periods described for each product type below and with the limitations described in this warranty. The warranty period applies from the date of purchase by the first customer. This warranty covers only defects in materials. KOMPAN's liability under this warranty is limited to repair or replacement of defective products, without charge, at KOMPAN's discretion. Defective electronic components will be delivered and changed by a KOMPAN ICON Professional installer free of charge.

2. WARRANTY APPLIES ONLY IF PRODUCTS HAVE BEEN PROPERLY INSTALLED AND MAINTAINED

The warranty only applies if KOMPAN's products have been installed according to the instructions provided by KOMPAN, and maintained correctly according to the KOMPAN Maintenance Manual. The warranty for ICON electrical components is dependent on those products being installed by an ICON trained and approved installer.

3. NO COVERAGE FOR ACCIDENTS, WEAR, TEAR, COSMETIC ISSUES, MISUSE OR VANDALISM

This warranty does not cover any damage caused by accident, improper care, negligence, normal wear and tear, surface corrosion on metal parts, discolored surfaces and

other cosmetic issues or failures due to misuse or vandalism. Natural changes in wood over time are considered cosmetic issues and are not covered.

4. PRODUCTS INSTALLED NEAR WATER

Products installed in direct contact with chlorinated water or saltwater (Waterparks), or products installed with occasional contact with such water or installed so close to the shore that they are subjected to salt spray are not covered by the KOMPAN warranty for any defects caused by corrosion.

Products installed in coastal areas, within 200 meters of the shore, will only be covered by the warranty for half the period of the standard product warranty in relation to defects caused by corrosion. KOMPAN's lifetime warranty if applicable is limited to a 10-year warranty in relation to such products.

5. THIRD PARTY SUPPLIED PRODUCTS & SERVICES

KOMPAN provides non-KOMPAN branded products and installation services performed by certified third party suppliers. This general KOMPAN warranty does not apply to such non-KOMPAN branded products and installation services, which may carry their own warranties. KOMPAN will pass on information about such warranties where possible.

ORGANIC ROBINIA CUSTOM OPTIONS

The KOMPAN CASE department can provide custom configurations of the new play structures

- Change activities on standard designs
- Add, change or remove the roof
- Add or remove towers
- FSC™ variants

All modules can be used for custom designs.

If required, plastic slides are also an option.

NEW ORGANIC ROBINIA FACTORY

FIND OUT MORE ABOUT ROBINIA

The idea behind KOMPAN Robinia represents a new way of designing playgrounds. By taking a unique, holistic approach to creating a play area, we stimulate children's interest in nature and introduce an understanding of nature into their lives. Visit our website for information and ideas. You'll also find a catalog request page and local contact details on our site.
