BLOOXING IS
FREEDOM

KOMPAN 

KOMPAN BLOQX

BLOQX melds contemporary sculpture and sport into a form that kids can't help but climb on. Bouldering is one thing, but "BLOQXING" is something completely different. Designed for every level of climbing ability, BLOQXING offers endless challenges. Either with a group or solo, kids can organize games, define routes, compete with each other or explore new ways to summit BLOQX.

The BLOQX concept was developed with world-class climbers and kids alike. This unique collaboration ensures BLOQX designs would meet every level of climbing ability - from the serious climber training for a first ascent to kids who are looking to explore their limits and the challenging sport of bouldering.

BLOQX fits perfectly in any environment with strong visual expression and beautiful geometric form. BLOQX fits like a sculpture into any urban setting.

BLOQX makes the most of every space, by filling it with challenge, sculpture and sport in a way like never before.

BLOQX

MR. BLOQX

MR BLOQX

Koos van Raalt established himself as a leader in the climbing community and advocate for outdoor climbing from years of participation in the sport. As the owner and operator of one of the largest outdoor climbing facilities in Europe, he also is on mission to share his love of the sport with others. Rather than focus his attention on 1 dimensional designs such as wall panels, Koos knew from his own experience that 3 dimensional designs offers more challenge, variety, and options.

BLOQX is a system that uses materials efficiently, installs quickly and unfolds to create a large-scale setting for serious climbers and beginners alike.

Koos passion for climbing drove him to develop the BLOQX concept and with the help of some of his friends - who also happen to be some of the best climbers in the world - BLOQX was created.

POWER

USER TESTS

KOMPAN has gathered a lot of different user groups, parents and pedagogues to test the BLOQX concept. Together with KOMPAN Play Institute member Karin Müller and external child expert Nadine Seyfried, who also is an experienced climber herself, we found BLOQX to be a compelling product for multiple age groups and genders. By ensuring the relevance of design and play value, we're also ensuring you make the most of your parks.

MATERIALS

MAIN COMPONENTS AND MATERIALS

CLIMBING GRIPS: KOMPAN customized design, based on professionally designed climbing grips – for best play value.

ALL PLATES: Are made of durable 19mm UV stabilized, colored-through, extruded, hot-press laminated, high-density polyethylene (HDPE)

CORNER BRACKETS and brackets for connecting two BLOQX are all made in Stainless Steel.

SURFACE AND IN-GROUND FOUNDATION are all made in Galvanized Steel – for exceptional durability.

TESTS KOMPAN's products and materials are not only tested in accordance with current safety standards in Europe and North America. They also fulfill our own strict demands for user safety proven play value and technical performance. For more detailed information regarding materials, measurements, drawings and descriptions please visit www.KOMPAN.com

“BLOQX caters for all levels of ability with easy routes for beginners and tougher more challenging routes for the more experienced climbers. It is an excellent product as It also encourages social interaction as the users tend to help and learn from each other.

Nadine Seyfried External child expert and climber – France

“With our new product BLOQX - KOMPAN presents a product that brings a strong message of climbing and meeting to active public spaces. Our various user tests have shown that BLOQX inspires and attracts users of all kinds.”

Karin Müller child expert and member of the KOMPAN Play Institute – Denmark

NEW

BLOXX PRODUCTS

The new KOMPAN product range consist of 6 NEW products in different sizes perfect for both small and large spaces. All offer a new and challenging climbing experience for kids 5 and older. Kids and adults alike will need to continuously plan their movements and train on BLOXX to discover every challenge the BLOXX products contain.

You won't find an easy way around BLOXX. To make sure, there's no climbing grips lower than 62 cm and every panel has different grip configuration. Our specially designed climbing grips also come in 2 different colors and sizes to create routing variety and challenging holds.

For designs with elevated BLOXX, secure, "Gripperholds" are included on the baseplate to provide a non slippery texture and a safe foothold.

With 6 new standard products, BLOXX can fit just about any site and number of users.

All products are tested and approved by the TÜV certification according to the European standard for playground safety EN 1176
